📘 NOTES (PDF READY)

CSS Transitions

- Used to create smooth changes
- Mostly used with hover
- Makes UI modern and user friendly

Roman Urdu:

Transition se changes smooth ho jate hain, website zyada professional lagti hai.

CSS Animations

- Used for complex movements
- Uses keyframes
- Can repeat automatically

Roman Urdu:

Animation se hum elements ko move, rotate ya fade kar sakte hain.

Mini Project Summary

- Gradient background
- Transition on hover
- Simple animation effect
